

You Need **DeckLok™** To Meet Code*

The patented DeckLok™ Advanced Lateral Anchor is revolutionizing the deck industry by providing a bolted connection at all critical structural locations. This system achieves the strength required to meet or exceed existing building codes for lateral pullout and guardrail post stability using standard construction designs and techniques.

Exceeds IRC and IBC
2006, 2009 and 2012
Code Requirements

Anchors Available in...

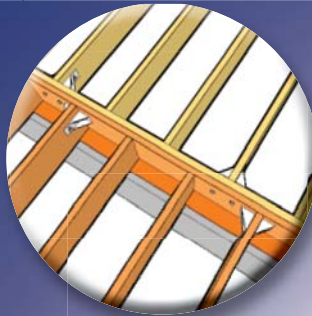

- Code-Compliant
Hot-Dipped Galvanized
- 316 Stainless Steel

Recent studies confirm that common methods of wood blocking used to fasten frame-mounted guardrail posts, and common methods of making ledger connections, fail to meet the International Residential Code.

Attention Deck Builders

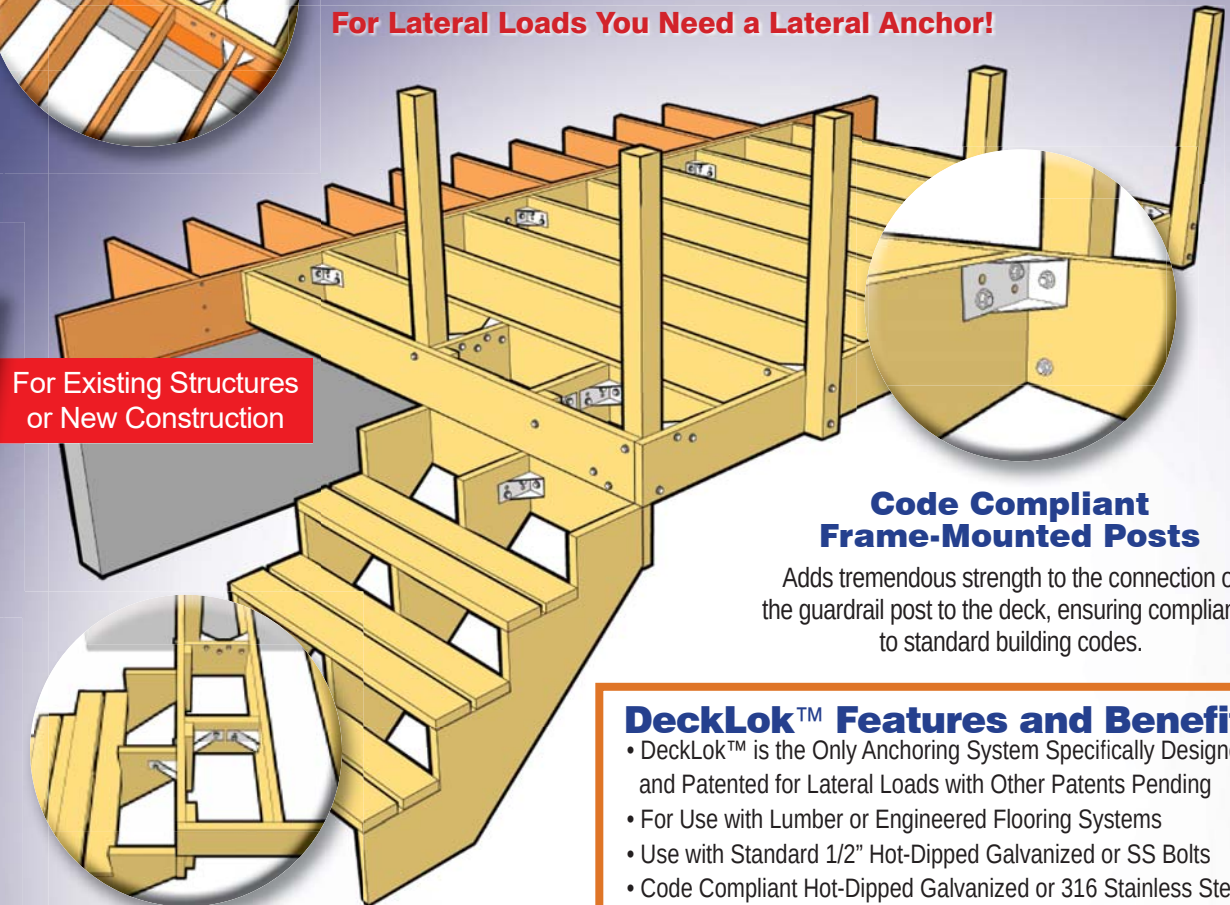

...Added Safety is Added Value

Code Compliant Ledger Connection*

DeckLok™ Lateral Anchors are designed to provide support against lateral/horizontal movement. DeckLok™'s tri-fold base deflects to provide additional durability under load while the offset bolt pattern preserves the structural integrity of the wood's end grain.

For Lateral Loads You Need a Lateral Anchor!

**For Existing Structures
or New Construction**

Code Compliant Frame-Mounted Posts

Adds tremendous strength to the connection of the guardrail post to the deck, ensuring compliance to standard building codes.

DeckLok™ Features and Benefits

- DeckLok™ is the Only Anchoring System Specifically Designed and Patented for Lateral Loads with Other Patents Pending
- For Use with Lumber or Engineered Flooring Systems
- Use with Standard 1/2" Hot-Dipped Galvanized or SS Bolts
- Code Compliant Hot-Dipped Galvanized or 316 Stainless Steel
- Easy to Install on Existing Structures or New Construction

Superior Stair Stringer Connection

Reinforces the connection between the stair stringer and the deck frame to reduce the possibility of the stairs shifting away from the deck.

Made In The USA!

*In Compliance with: 2006 IRC R502.2.2.2 - Deck lateral load connection (See details at www.Deck-Lok.com/code)

Build In Safety with

DeckLok™

- ICC-ESR 2114
- Common Methods of Blocking in Guardrail Posts to a Structural Wood Frame Fail to Meet Code*
- One Pair of DeckLok™ Lateral Anchors Provides Up To 4,000 lbs. of Pullout Resistance
- DeckLok™ is the Most Cost Effective Way to Consistently Build a Safe and Secure Deck and Guardrail System

DeckLok™ Patent #6,311,449. Other patents pending.

DeckLok™
\$100,000 Guarantee

Screw Products, Inc.
guarantees the structural integrity of
the DeckLok™ Lateral Anchor, covering
all materials, labor, and any medical
expenses up to \$100,000 resulting
from a failure of this product.

RailLok™ Fence & Rail Section
Bracket System

Half the size of DeckLok™, but just as tough!
Provides a strong, reliable railing-to-post
connection. Stocked in 316 Stainless Steel,
and Black or White powder coat finish.
Custom colors available on request.
