Some New Features On Our Gen II Line!

Horizon Curve™

A slight curvature of the head for elegant, professional, architectural results. The Finish Ring underneath the head also provides a better finish by cutting the top fibers in the wood for an extra step in countersinking.

AXIS™

NOVA™

ROCO™

FASCIA

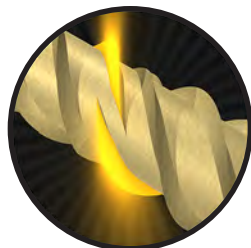

Turbine Ribs™

The patented (# 11,346,388 B2) Turbine Ribs cut quickly into the wood, leaving a professional, clean finish with maximum wood contact. The cup shaped, countersinking head provides increased holding power and reduced risk of splitting.

AXIS™

EPIC™

ROCO™

Twin Blades™

This patented (#11,359,661 B2) set of knurls cuts fast to dramatically reduce friction and heat on the shank, while reducing load on the drill. They also provide better performance by removing debris faster than a standard fastener's knurl.

AXIS™

EPIC™

AURA™

NOVA™

YUKON™

Fast Start Tip

With sharp threads all the way to the tip, the fastener has an immediate grip for a fast start. The inset thread cut drastically reduces the splitting effect and minimizes the driving torque needed to engage the wood.

AXIS™

EPIC™

PICO™

AURA™

NOVA™

YUKON™

About Our New GEN II Coatings

Corrosion Protection: Medium	Corrosion Protection: High	Corrosion Protection: Very High
For Typical Interior Use	For Typical Exterior Use	For Tough Environments
Compatible for use in a wide variety of interior wood applications. Its use is limited to interior untreated lumber. For exterior applications and use in pressure treated lumber, use exterior coated fasteners or stainless steel fasteners. Always assess the environment before selecting the type of coated fastener. Some corrosive environments including bathrooms, kitchen sinks, exposure to chemicals and use of pressure treated lumber may cause early failure. • ZYTEC™+	Tested and recognized for use in most ground contact pressure treated lumber for general exterior construction as described by the American Wood Protection Association (AWPA) U1 UC4A or below. For environments above UC4A, use proper grade of stainless steel. Always assess the environment before selecting the type of coated fastener. Some corrosive environments including exposure to water, airborne salt, chemicals and pressure treated lumber rated above AWPA UC4A may cause early failure. • ZYTEC™ GX • ZYTEC™ XT	Stainless Steel AISI 316 is code compliant for use in marine environments with saltwater splash, airborne salts, and areas with de-icing salts. Stainless Steel Our stainless steel is either AISI 302, 304 or 305 and is code compliant for use with ground contact pressure treated lumber in wet environments such as near freshwater lakes and rivers, and for use in redwood and cedar.

Always follow timber manufacturer's recommendations for fasteners!

AXIS™**ZYTEC™+ General Interior Structural Wood Screws**

The **AXIS™** screw is designed to take wood screws to an entire new level. Our extra sharp, Fast Start Tip saves time on site and the Twin Blades™ outperform any other knurl. The self-tapping thread cuts effectively through materials such as wood, plastic and sheet metal. The Turbine Ribs™ ensure an incredibly clean finish. Its cup shaped countersinking provides unparalleled holding power and less risk of splitting. The Horizon Curve™ leaves an elegant appearance.

The **PICO™** Finish screw is a slim fastener, yet engineered for good holding power. Our extra sharp Drill Cut Tip cuts wood fibers and reduces splitting of board edges. The self-tapping thread cuts effectively through materials such as wood, plastic and sheet metal. The wide threads provides a strong connection while the reverse threads helps pull down fibers. The tiny head stays out of sight for a clean, professional finish. Fits with most concealed mounting tools. White Head available.

The **PICO™** Finish screw is a slim fastener, yet engineered for good holding power. Our extra sharp Drill Cut Tip cuts wood fibers and reduces splitting of board edges. The self-tapping thread cuts effectively through materials such as wood, plastic and sheet metal. The wide threads provides a strong connection while the reverse threads helps pull down fibers. The tiny head stays out of sight for a clean, professional finish. Fits with most concealed mounting tools.

ROCO™

ZYTEC™ GX Exterior Wood to Steel Screws

Includes Drive Bit

The ROCO™ Wood to Steel screw is specifically designed for increased holding power and an incredibly clean finish. When engaging the wood, the screw effortlessly drills through the wood while the wings mill an oversized hole. When the screw engages the steel base, the oversized hole prevents threads from engaging the wood, lifting wood and steel apart (jacking). The specially engineered drill point cuts fast through the steel and the threads firmly clamp the wood and steel together.

Heat Treated, Hardened Steel

The VEGA is specially designed to be fastened in the bottom of the corrugated plastic panel, resulting in a smoother installation and more aesthetic look. No predrilling needed! The wings mill an oversize hole which allows for thermal movement and reduces the risk of cracks. The special washer seals perfectly and covers the hole completely. Coated with **ZYTEC™ M** for typical outdoor use and with Self-Tapping threads.

FASCIA**#9 x 1-7/8" 316 Stainless Star Drive Fascia Screws**

Includes Drill & Drive Bits

NEW!! Easily secure your Composite or PVC Fascia (with popular board matched head colors!). Our system helps provide a beautiful, durable connection for years to come! While other brands cut into the surface of the fascia boards often leaving shavings behind exposed, our solution leaves a cleaner finished surface and the hole sealed off completely. Each jar contains everything you need for installation and no additional custom tools are required!

**Coming Fall 2024!****D2W™ Deck2Wall Spacers**

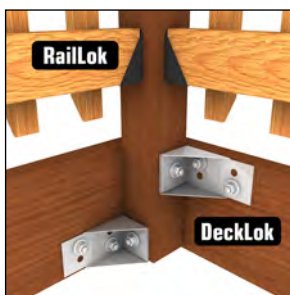

Deck2Wall Spacers vs Washers

Designed to easily and efficiently provide airspace between buildings and deck ledgers, stair stringers, shade structures, railing posts, fence posts, and more to help prevent rot. Deck2Wall Spacers are easy to install. Simply fasten the spacer to the ledger with properly sized screws or nails through the attachment holes prior to bolting the ledger to the structure. The large diameter provides greater bearing surface than standard washers.

Item #	Description	Net Wt (10)
D2W58	Deck2Wall Spacer 2 1/2"	0.1 lbs

Space With Deck2Wall Spacers

**Made In The USA!****DeckLok® Deck Brackets & RailLok® For Railing Sections****Made In The USA!****DeckLok ICC**

DeckLok® Lateral Anchor System will provide a bolted connection at all critical structural locations of your deck. A single pair of DeckLok brackets will provide 4000 lbs of pull out resistance. DeckLok will also increase rail post connections by up to 500%. Great for the deck-to-ledger connection, stair stringer, rail post and more.

RailLok® is used to connect fence sections to the rail post. Attach the brackets to the rail post using included screws and then slip pre-assembled fence sections into the brackets and screw them in place. RailLok brackets provide a strong, reliable fence section to post connection.
